Microbiologics

Certificate of Analysis

Product Name:

Catalog Number: RXXXX

Lot Number: RXXXX - 100

Expiraton Date: YYYY-MM-DD

Product Information	
Product Description	Inactivated in a preservation buffer
Strain	
Storage Conditions	- 20° C or below
Volume per vial	≥ 500 µL
Buffer	Preservation Buffer
Applications	For research use only. Not for human or diagnostic use.

Quality Control Information	
Inactivation Method	
Fungal & Bacterial contamination testing	No growth
Test Method	Concentration has been determined using in-house extraction and ddPCR methods.
Genomic concentration determined via ddPCR	X.XXE+XX copies/mL

SAMPLE

Warnings & Precautions:

• This material is intended for research use, assay development, and related investigational applications by trained laboratory personnel using good laboratory practices.

• This material must be treated as a potential biohazard. Universal laboratory precautions should be used during the handling and disposal of this material in addition to the user's institutional biosafety and laboratory procedures.

• Avoid repeated freeze-thaw cycles and do not use the material outside its recommended storage conditions. Mix prior to use.

• Performance is not specific to an extraction method or instrument. User results for quantification may vary based on the individual facilities exact methods and protocols used. Laboratories should determine performance and the acceptable range based on each test method.
