

Your Trusted Provider for Microbiome Services

At Microbiologics, we are the world's leading experts and go-to collaborators in biological products and services, focused on creating a safer, healthier world. We are proud to support microbiome research and the opportunity it presents in discovering new life-changing therapies.

Isolation, Evaluation, Characterization and Enumeration

We take a collaborative approach to each client's unique testing needs. With deep expertise in microbiome testing and anti-infective development, we are a globally trusted CRO partner in bringing new therapies to market.

- Isolation and testing of organisms that are constituents of the microflora (e.g. intestinal/fecal, skin).
- Evaluation of prebiotic impact on organisms in co-culture.
- Characterization of probiotic or live biotherapeutic product (LBP) strains.
- Evaluating the effect of probiotics / anti-infectives on the levels of important members of the intestinal microflora.
- Enumeration of viable bacteria from probiotic or LBP formulations.

Microbiologics is compliant to GLP Regulation 21 CFR 58.
