

EZ-ACCU SHOT™ QUALIFICATION PROGRAM

Seamless, stress-free qualification of EZ-Accu Shot for Growth Promotion Testing in your laboratory

Manual preparation of compendial strains for media challenge testing is labor intensive and presents risks in QC testing. With EZ-Accu Shot test-ready organisms from Microbiologics, you can be certain your testing and documentation will satisfy regulatory requirements and ensure QC compliance. Our one-of-a-kind EZ-Accu Shot Qualification Program is designed to simplify and guide you through the process of qualifying EZ-Accu Shot for use in the Growth Promotion Test or other media challenge testing.

How the Program Works:

1. Get started by reaching out to your area sales representative, or by contacting info@microbiologics.com
2. We will follow up with you and prepare a customized quote including timeline, strain requirements and pricing.
3. Your EZ-Accu Shot Qualification products are shipped to your laboratory. You will receive three individually packaged EZ-Accu Shot pellets (with Hydration Fluid) from three different lots of each of the five USP compendial strains and Escherichia coli derived from ATCC® 8739™* (18 total pellets).
4. You will receive our complete guide for qualifying of EZ-Accu Shot organisms, outlining and documenting each step of the process from planning to testing and reporting.
5. Our team of Technical Support Scientists is ready to assist you each step of the way!
